MARCA
: DIXON VALVE

MODELO
: 79950411

Applications:
These in-line check valves allow air to pass in one direction while blocking flow in the other direction.
Their extreme compactness and light weight make them suitable as a safety item in compressed air circuits.

Features:
Meter out check valve
The body of the fitting contains an arrow to indicate the direction of flow.
Pre-applied thread sealant

Construction:
Nylon with nickel plated brass base

How it works:
A pressure of more than 7 PSI will overcome the spring pressure, which is keeping the valve closed, thus allowing the passage of air.

Safety notes:
WARNING: Cancer and Reproductive Harm- www.P65Warnings.ca.gov
