FLOMAX FLUSH FACE COUPLINGS

The FLOMAX patented non-interchangeable feature means each color will only mate with its corresponding colored receiver or nozzle.

- New patented design uses an internally sealed ball lock mechanism to ensure trouble-free performance even in the harshest of conditions.
- 12 color choices and sizes are available along with a universal evacuation nozzle. Additional special order sizes and colors are also available.
- Hardened stainless steel receiver nose ensures that FloMAX Flush Face connectors can be operated at a higher pressure than many other dry break connectors.
- All of the Flush Face connectors have the exact same outside dimensions.
- Can be connected or disconnected under pressure.
- Can be connected without pulling back on the nozzle pullback.

Safety notes: WARNING: Cancer and Reproductive Harm- www.P65Warnings.ca.gov
