SKU
: 25380

BRAND
: DIXON VALVE

MODEL
: RN200NO

Use:
Stems are for use with lap joint flanges.
When used with an appropriate notched ferrule, these fittings can be swaged or crimped onto hose providing improved shank retention.
When used with double bolt or band clamps, notched turn back nipples provide shank retention similar to that of the King turned back nipples.

Features:
The stem can be removed from a damaged hose by cutting away the ferrule without necessarily damaging the fitting.

Note:
Special pusher RN200NOPUSH is required.

Safety notes:
Dixon stems and ferrules are specifically designed to be used together as a coupling system.
Due to differences in dimensions and tolerances for safety reasons, do not use other manufacturer's stems or ferrules with Dixon products.
You must purchase a fitting and the matching ferrule to create an assembly.
