*** Some features may vary without prior notice. Sale subject to inventory availability*

Applications:
Installed on drop leg of a top-load loading arm to distribute media evenly to help reduce splash

Features:
Diffusers distribute media evenly 360°
T-deflectors distribute media to the sides of the tank, railcar, or tote

How it works:
Attached to drop tube "stinger leg" of the top-loading arm to diffuse media being loaded. The media is not discharged straight downward offering more stability in the arm during the loading process.
